Meds for Vets values your business and your patients' health.

We look forward to partnering with you to solve your most difficult medication challenges.

Happy Pets • Happy Owners • Happy Vets™

Solving your *most difficult* medication challenges

While many veterinary patients are amenable to the limited array of commercially available dosage forms, many are not. Commercially produced products are often designed for humans at strengths too high for the majority of veterinary patients. Tablets and capsules are often too large. Fruity flavorings, while well suited to the majority of exotics, are poorly accepted by many dogs and cats. Owners often have difficulties administering even the simplest of dosage forms. Add to this the unwillingness of some patients to tolerate any medication knowingly, and even the most effective medication may become a clinical failure rather quickly.

Customized Capsules

At Meds for Vets, we are able to provide the dosage form best suited to your patient at exactly the right dosage.

Many patients can be dosed effectively with capsules. Because we compound for the veterinary field exclusively, we use the smallest capsule size possible for each dose. While most pharmacies compound primarily with size 1 capsules, too large for all but the largest dog, we compound primarily with size 3 and 4 capsules, suitable for even the smallest dogs, cats, and kittens.

Flavored Suspensions, Chewable Treats, Feed Additives and Oral Pastes

Even small capsules may be too difficult to dose for some patients. Specialized flavorings are often the answer.

Our Triple Fish suspension for cats begins with a puree of salmon, sardines and tuna

designed to hide even the most persistent medication tastes. Our Triple Meat suspension of chicken, pork and ham works equally well for dogs. Chewable treats and flavored feed additives afford the benefits of customized flavoring with pre-measured dosing. Flavored oral pastes offer a convenient equine dosage both at home and at the track. These and other dosage forms can be designed to meet specialized needs such as sodium restrictions, sugar-free preparations and others upon request.

Transdermal Gels

The most difficult of patients sometimes need to be medicated without even knowing it!

A mixture of both fat-soluble and water-soluble compounds, Transdermal Gels are suitable for almost any medication. All but very large molecules, e.g. insulin, can be effectively administered through this dosage form. Because transdermal gels can also be absorbed through the skin of the owner, we provide specialized instructions as well as finger cots for both safe and effective administration of these products.

Sterile Injectables and Ophthalmics

When a sterile product is required, look to Meds for Vets for quality injectables and ophthalmics.

Whether you're looking for sterile eye drops or ointments, small animal or equine injectables, you will be pleased with the selection and quality we are able to offer. Our products are rigorously tested for potency and sterility from both bacteria and fungi to ensure your complete satisfaction.

Introducing *even more* dosing choices

It all adds up to convenience... Happy pets. Happy owners. Happy vets.™ Count on us to simplify your life!

Looking for even more dosing choices? Simplify your life with our **Simpli-Choices™** to ensure that you'll find just the right dosage form for you.

Simpli-Chew™ Chewable Tablets

Looking for economical, tasty chewable tablets?

Our Simpli-Chew™ meat-flavored chewable tablets are quarter-scored for the ultimate in dosing flexibility. Count on Simpli-Chew™ tablets to weigh in as a hit for all of your patients, from two pounds to two hundred!

Simpli-Small™ Tablets

Looking for an even smaller option?

At only 1/4 of an inch in diameter, it's "Now you see it, now you don't" with our Simpli-Small™ tablets. Smaller than a breath mint, they are easy to conceal and can even be placed at the back of the tongue, avoiding the taste buds all together! For an easy to give, affordable option, count on Simpli-Small™ tablets.

Simpli-Clear EKT™ Ear Gel

Want a single dose that treats long-standing ear infections for only pennies per ear?

A powerful combination of an antibiotic, antifungal and steroid, Simpli-Clear™ EKT has been proven effective against even challenging pseudomonas infections. It's safe, effective, and best of all, usually only takes one treatment administered by YOU (no client dosing required!).

Simpli-New™

Want to be sure that you will be able to use your compounded product before the expiration date?

Rest assured with our Simpli-New™ product guarantee. Just return any unopened package to us and we will ship you out a fresh replacement at no cost. It's just that easy.

A portion of all proceeds is donated to animal-related causes.

BIG or small, *no problem at all!*

When it comes to treating veterinary patients, it can be a real ZOO! But we've got you covered with a broad range of creative dosing solutions for any size patient, anywhere.

Treating LARGE animals? Try our flavored powders, oral pastes or even flavored medicated crispy rice treats. Clever ones like primates? Try our medicated grape jellies on their favorite cracker. From medicated water sources to specialty treats and other dosage forms, think of Meds for Vets Pharmacy for all of your compounding needs. After all, it can be a real jungle out there!

Representative product list

Following are some of the many products that we are able to customize to meet your dosage and flavoring needs. Don't see a particular product? Call us! We'll find it for you.

A

Acepromazine Maleate capsules, chew treats, injection, paste, powder, Simpli-Chew™, suspension, transdermal

Acetazolamide capsules, powder, suspension

Acetyl-Cysteine capsules, eye drops, injection, suspension

Acetyl-D Glucosamine injection

ACTH gel, solution injection

Acyclovir eye ointment, suspension, topical ointment

Albuterol capsules, suspension, transdermal

Allopurinol capsules, suspension

Altrenogest capsules, paste, suspension

Aluminum Chloride powder

Aluminum Hydroxide capsules, chew treats, powder, suspension

Amantadine HCL capsules, suspension

Amikacin Sulfate injection, suspension, ear ointment

Aminocaproic Acid capsules, suspension

Aminopentamide Hydrogen Sulfate capsules, Simpli-Small™

Aminophylline capsules, suspension, transdermal

Amitraz solution

Amitriptyline HCL capsules, chew treats, injection, Simpli-Small™, suspension, transdermal

Amlodipine capsules, chew treats, Simpli-Small™, suspension, transdermal

Ammonium Chloride capsules, powder, suspension

Amoxicillin capsules, chew treats, powder, suspension, transdermal

Amoxicillin Sodium injection, inj kit, powder

Amoxicillin/Clavulanate capsules, chew treats, powder, Simpli-Chew™, suspension, transdermal

Amphotericin B capsules, suspension

Ampicillin capsules

Ampicillin Sodium suspension

Apomorphine HCL capsules, injection, tablet triturates

Artificial Tears pH of 6 eye drops

Ascorbic Acid injection, powder

Aspirin capsules, chew treats, paste, powder, suspension, transdermal

Atenolol capsules, chew treats, suspension, transdermal

Atropine Sulfate eye drops, eye ointment, injection

Azathioprine capsules, chew treats, suspension, transdermal

Azithromycin capsules, chew treats, eye drops, paste, Simpli-Chew™, suspension, transdermal

B Bacitracin/Neomycin/Nystatin/Triamcinolone topical cream, topical ointment

Benazepril HCL capsules, chew treats, suspension, transdermal

Betamethasone Acetate/Betamethasone Sodium Phosphate injection

Betamethasone Dipropionate/Betamethasone Sodium Phosphate injection

Bethanechol Chloride capsules, injection, paste, powder, suspension, transdermal

Bismuth Subcarbonate capsules, suspension

Budesonide capsules, chew treats, Simpli-Small™, suspension, transdermal

Bupivocaine Hydrochloride topical gel, injection

Buspirone HCL capsules, chew treats, suspension, transdermal

C Cabergoline capsules, suspension

Caco Copper injection

Calcitriol capsules, suspension, transdermal

Calcium Carbonate suspension

Calcium EDTA eye ointment, injection

Calcium Glubionate suspension

Calcium Gluconate capsules, injection

Calcium Levulinate injection

Calcium Glycerophosphate/Calcium Lactate injection

Cantharidin Lactate/Salicylic Acid/Podophyllin topical solution

Carbachol injection

Cabazochrome Salicylate injection

Carbimazole capsules

Carprofen capsules, chew treats, Simpli-Chew™, suspension, transdermal

Cefadroxil capsules, chew treats, suspension

Cefpodoxime Proxetil suspension

Celecoxib suspension

Cephalexin capsules, chew treats, eye ointment, suspension, transdermal

Chlorambucil capsules, chew treats, suspension

Chloramphenicol capsules, eye drops, eye ointment

Chloramphenicol Palmitate paste, powder, suspension

Chloramphenicol/Prednisolone/Tetracaine eye drops

Chlorpheniramine Maleate capsules, chew treats, injection, suspension, transdermal

Chlorpromazine HCL injection, suspension

Chromium Picolinate powder, suspension

Cidofovir eye drops, eye ointment

Cimetidine capsules, injection, paste, powder, suspension, transdermal

Ciprofloxacin HCL capsules, chew treats, paste, powder, suspension, transdermal

Cisapride Monohydrate capsules, chew treats, injection, Simpli-Chew™, Simpli-Small™, suspension, transdermal

Citalopram capsules

Clarithromycin capsules, suspension

Clindamycin HCL capsules, chew treats, suspension, topical ointment, transdermal

Clindamycin Phosphate injection

Clomipramine HCL capsules, chew treats, Simpli-Chew™, suspension, transdermal

Clopidogrel capsules, chew treats, suspension

Colchicine capsules, suspension

Cylopentolate HCL eye drops

Cyclophosphamide capsules, chew treat, suspension

Cyclosporine capsules, chew treats, eye drops, eye ointment, suspension, topical ointment

Cyclosporine/Tacrolimus eye drops, eye ointment

Cyproheptadine HCL capsules, powder, suspension, transdermal

D

Danazol capsules

Demecarium Bromide eye drops

Desmopressin Acetate capsules, eye drops, injection, nasal drop

Dexamethasone capsules, paste, powder, suspension, transdermal

Dexamethasone Sodium Phosphate eye ointment, injection, topical cream

Dexpanthenol injection

DHEA capsules

Diazoxide capsules, powder, suspension, transdermal

Dichlorphenamide capsules, eye drops suspension

Diclofenac Sodium eye ointment, topical cream, topical gel

Diethylstilbestrol capsules, chew treats, injection, Simpli-Chew™, Simpli-Small™, suspension

Digoxin capsules, suspension

Dihydrotestosterone capsules, chew treats, suspension

We specialize in *hard to find products, customized flavorings and dosage forms.*

We Care! As always, a portion of every purchase you make through Meds For Vets helps fund animal related causes. From supporting low cost spay/neuter clinics to no-kill sanctuaries to fighting third-world poaching, we take protecting the lives and wellbeing of animals around the globe as seriously as you do. So you can feel as good about the health of animals globally as you do about the ones you care for every day.

Thank you for your interest in Meds for Vets! Because we serve only the veterinary community, we specialize in hard to find products, specialized flavorings and customized dosage forms to solve even your most difficult medication challenges.

- Looking for easy to give medications?
Consider our large selection of veterinary-specific flavors including many proprietary alternatives, as well as transdermal gels, Simpli-Chew™ and Simpli -Small™ tablets for even the most challenging of patients.
- Looking for a medication in a different strength or dosage form?
We can customize almost any medication to any strength or dosage form.
- Having problems finding a particular drug?
Think of us for back-ordered and discontinued products that you can't find anywhere else.
- Want extended dating?
With proven extended dating on many products and our Simpli-New™ program, we've got you covered.
- Choose the compounding pharmacy that veterinary ophthalmologists trust most. Count on us for the highest quality sterile products.

It all adds up to the best product selection and palatability at the best prices. Call us today!
